FRAUNCES / DISPLAY / MEDIUM WEIGHT

Inter keeps the message modern and clear.

INTER / BODY, LABELS AND DIGITAL UI

RULES

- Fraunces for English headlines; Inter for body copy and calls to action.
- Tajawal for Arabic, with natural RTL spacing and stronger headings.
- Keep copy short; use generous space, fine rules and one clear focal point.

SHAPE LANGUAGE

20-36 px cards / pill buttons / soft shadows / gold hairlines

03 / ART DIRECTION AND USE

Tactile luxury. Digital precision.

Prefer abstract materials, soft color fields, silk movement, fluid marble, architecture, close crops and controlled light. Grade photography toward burgundy, wine and champagne.

USE

- One dominant message, one focal image and generous breathing room.
- Use subtle grain, tactile texture and gentle glow. Choose ivory for clarity or wine for premium campaign moments.

AVOID

- Corporate stock, clutter, hard neon, cartoon graphics and excessive gold.

QUICK CAMPAIGN RECIPE

Ivory or wine base. Burgundy message. Gold cue.

Short copy. One premium texture. One decisive call to action.
